

ZEYTIN
IN SPACE

A Coloring Journey Through the Solar System

by Olcay Plevne

Blast off with Zeytin, a fluffy black-and-white space cat with a pirate eye patch, on a journey from Earth all the way to Pluto — and back home again!

Color real science on every page: glowing auroras, footprints on the Moon, sunspots, Olympus Mons, Saturn’s icy rings, the geysers of Triton and Pluto’s giant heart.

At each stop, a big detailed coloring page sits next to a short, true story packed with amazing facts.

Best with colored pencils or crayons.
